GLOBAL MARKETS & ECONOMIES

GLOBAL MARKETS

- U.S. stocks, the dollar and Treasury yields fell on Friday in a volatile session tied to developments in a probe into Russia's involvement in the U.S. election as well as by progress with a tax bill in Congress.

GLOBAL ECONOMIES

- Australia's central bank is seen as all but certain to keep its cash rate at a record low of 1.5 percent at its monthly policy meeting next week, a Reuters poll of economists found.
- New Zealand's terms of trade hit a record high in the third quarter, pointing to a brighter outlook for a key growth driver at a time when the rest of the economy is encountering headwinds.
- Prime Minister Shinzo Abe's top economic advisory panel wants the coming year's budget to reflect a combination of monetary easing and "growth-oriented" fiscal policy - while at the same time it reins in spending.
- Euro zone factories had their busiest month for over 17 years in November in a broad based acceleration, a purchasing managers' index showed, despite them hiking prices at the fastest rate in more than six years.
- Greek manufacturing activity continued to expand in November with rising demand and a robust increase in new orders leading firms to hire staff at one of the fastest rates in the last 18 years, a survey showed on Friday.
- Signs of progress in Britain's negotiations to leave the European Union mean the chance of a disorderly Brexit declined in the past month, a Reuters poll found, and the talks will probably end with a free trade deal.
- St. Louis Fed President James Bullard warned on Friday of a key "bearish signal" emerging for the economy if the Fed continues raising interest rates as fast as policymakers currently intend, and called on his colleagues to move more cautiously in the drive to more normal monetary policy.

GLOBAL MARKETS

U.S. & Global Markets – U.S. stocks, the dollar and Treasury yields fell on Friday in a volatile session tied to developments in a probe into Russia's involvement in the U.S. election as well as by progress with a tax bill in Congress.

Stocks and the greenback tanked mid-session after an ABC report that former national security adviser Michael Flynn was prepared to testify that Donald Trump instructed him to make contact with Russians during the presidential campaign.

The sharp moves partially reversed after U.S. Senate Republicans said they had enough support to pass a tax overhaul bill later in the day.

The S&P 500 closed at a record high on Thursday partly on hopes of passage of the bill, expected to cut corporate taxes. The Dow and the S&P both ended up for the week.

"It looks like (the moves in markets are) a reaction to news that Flynn is prepared to testify against Trump," said William Delwiche, investment strategist at Robert W. Baird in Milwaukee.

"You step back and look over the move we have had over the last week and a half, you could argue we are due for some sort of pull back or consolidation."

Reuters could not immediately verify the ABC News report on Flynn's possible testimony, which would put the Republican president in an uncomfortable spot after he has denied any collusion between his campaign team and Moscow.

Flynn also pleaded guilty to lying to the FBI about contact with Russia's ambassador. His reported decision to cooperate with the investigation led by Special Counsel Robert Mueller marked a major escalation in a probe into Russia's alleged attempts to influence the 2016 U.S. presidential election.

If the Russia probe derails the tax legislation, it could hurt the chances of Republicans retaining their majorities in the House and Senate next year and jeopardize .

The Dow Jones Industrial Average fell 40.76 points, or 0.17 percent, to 24,231.59, the S&P 500 lost 5.36 points, or 0.20 percent, to 2,642.22 and the Nasdaq Composite dropped 26.39 points, or 0.38 percent, to 6,847.59.

The S&P earlier fell as much as 1.6 percent.

The pan-European FTSEurofirst 300 index lost 0.74 percent and MSCI's gauge of stocks across the globe shed 0.39 percent.

Emerging market stocks lost 0.43 percent. MSCI's broadest index of Asia-Pacific shares outside Japan closed 0.18 percent lower.

The dollar index fell 0.17 percent, with the euro down 0.11 percent to \$1.1889. The dixie fell as much as 0.5 percent earlier.

"To the extent that this (Flynn) headline further ensnares this administration into this investigation or suggests a widening of the Special Counsel's probe I think that it is certainly a key concern for global investors and that's why we are seeing the dollar come off," said Omer Esiner, chief market analyst at Commonwealth Foreign Exchange in Washington.

The Japanese yen strengthened 0.37 percent versus the greenback at 112.12 per dollar, while sterling was last trading at \$1.348, down 0.33 percent on the day.

Benchmark 10-year notes last rose 15/32 in price to yield 2.3633 percent, from 2.415 percent late on Thursday. The yield hit a session low of 2.315 percent.

The 30-year bond last rose 46/32 in price to yield 2.76 percent, from 2.831 percent late on Thursday and after hitting 2.716 percent at the day's low. ([Source Reuters – @her1en](#))

GLOBAL ECONOMIES

Australia – Australia's central bank is seen as all but certain to keep its cash rate at a record low of 1.5 percent at its monthly policy meeting next week, a Reuters poll of economists found.

Out of 42 economists polled by Reuters, 41 forecast the Reserve Bank of Australia (RBA) would stand pat at its policy meeting on Dec. 5.

The RBA eased twice last year but has since held steady as it balances the risk of fuelling further borrowing in the country's red-hot property market against tepid inflation.

While the majority predicted the central bank would keep rates steady until the third quarter of next year, 23 of 41 respondents forecast that it would tighten at least once by December next year, against one who expects two easings.

Cash rates are seen at 2.0 percent by June 2019, according to the median of 38 economists.

Economists were asked what the cash rate would be after the next RBA meeting in December and where rates would be at the end of each quarter until June 2019.

New Zealand – New Zealand's terms of trade hit a record high in the third quarter, pointing to a brighter outlook for a key growth driver at a time when the rest of the economy is encountering headwinds.

The terms of trade rose 0.7 percent in the three months to the end of September, data from Statistics New Zealand showed on Friday, though it was below economists' forecasts of a 0.9 percent jump.

"The fact that it's hit a new record high is a really new supportive factor for this economy at a time when a few other growth drivers are flattening off and business confidence is looking a little wobblier," said Sharon Zollner, Auckland-based chief economist at ANZ Bank.

The New Zealand dollar edged down to \$0.6828 after the release from around \$0.6839 earlier in the morning, weighed down by the small shortfall versus expectations and a report on Thursday showing that business confidence hit an eight-year low in November.

The terms of trade measures the prices received for a country's exports versus the cost of its imports.

Lower global prices for key New Zealand imports such as oil and electronics were behind a 2.6 percent fall in import prices in the third quarter, outpacing a 1.9 percent drop in export prices, Statistics New Zealand said.

On an annual basis, the terms of trade rose 12.3 percent, driven by this year's recovery in prices for dairy, the country's largest goods export, thanks to lower global supply.

New Zealand's economic growth has slowed this year as the previously booming construction sector suffered from a skill shortage with further headwinds likely as immigration started to ease off record highs.

Firms have also been fretting over the new Labour-led government and its plans to promote more protectionist policies and to slow down price growth in the housing sector.

The terms of trade outcome is largely in line with expectations and is therefore unlikely to alter the Reserve Bank of New Zealand's determination to keep rates on hold at a record low of 1.75 percent, possibly for years, according to economists.

Japan – Prime Minister Shinzo Abe's top economic advisory panel wants the coming year's budget to reflect a combination of monetary easing and "growth-oriented" fiscal policy - while at the same time it reins in spending.

These seemingly-conflicting goals are contained in a budget outline released on Friday by the Council on Economic and Fiscal Policy (CEFP).

In the outline, the council said the budget for the fiscal year beginning April 1 should focus on varied priorities, including childcare, human capital, productivity and innovation.

"Attention should be paid to an apt combination of monetary policy with growth-oriented fiscal policy more than ever, together with structural reform, needless to say," the outline said.

It urged the government to completely end deflation by accelerating a "virtuous cycle of economy" to achieve an ambitious target of boosting nominal gross domestic product to 600 trillion yen. (\$5.34 trillion)

The outline came as Abe, who has used the central bank's monetary easing to prioritise growth over austerity, faces pressure to spend more on social welfare, public works, agriculture and defence.

The council's input sets the stage for the finance ministry to compile the draft budget later this month, likely to be sent to parliament in January.

Euro Zone – Euro zone factories had their busiest month for over 17 years in November in a broad based acceleration, a purchasing managers' index showed, despite them hiking prices at the fastest rate in more than six years.

Forward looking indicators pointed to the momentum continuing through to the end of 2017, capping off what is expected to be the best year for euro zone economic growth in a decade.

"November's surveys produced a clean sheet of improved PMI readings for all countries, resulting in the best performance for euro zone manufacturing since the height of the dot-com boom," said Chris Williamson, chief business economist at survey compiler IHS Markit.

IHS Markit's final manufacturing Purchasing Managers' Index for the bloc climbed to 60.1 last month from October's 58.5. That was above a preliminary estimate of 60.0 and the second-highest in the survey's 20-year history.

An index measuring output which feeds into a composite PMI due on Tuesday and seen as a good gauge of economic growth jumped to 61.0 from 58.8, its highest since February 2011.

Suggesting the expansion will continue through December, new orders soared, backlogs of work were built up at a survey-record pace and headcount was increased at the fastest rate since IHS Markit started measuring it in mid-1997.

That upturn came despite firms increasing prices. The output price index bounced to 56.8 from October's 55.8, a level not seen in over six years.

Inflationary pressures, alongside booming growth, will likely be welcomed by policymakers at the European Central Bank who announced in October a cut to monthly bond buying from January.

Greece – Greek manufacturing activity continued to expand in November with rising demand and a robust increase in new orders leading firms to hire staff at one of the fastest rates in the last 18 years, a survey showed on Friday.

Markit's Purchasing Managers' Index (PMI) for manufacturing, which accounts for about 10 percent of the economy, rose to 52.2 from 52.1 in October, marking a sixth straight month of improvement. Readings above 50 denote expansions in activity.

Rising demand at home, coupled with increased export orders, were the main drivers behind the sector's continued expansion.

"Growth was driven by the strongest rise in new orders since February 2014, which in turn contributed to the sharpest round of job creation for 18 years," said IHS Markit economist Alex Gill.

"These are encouraging signs for the Greek economy which has suffered from both a chronic lack of demand and an exceedingly high rate of unemployment," he said.

Greece's jobless rate soared after the country succumbed to a debt crisis from 2009, leading to a prolonged recession and multiple state bailouts.

At 21.1 percent in the second quarter, rate is the highest in the euro zone. The government projects unemployment will fall to 18.4 percent next year, targeting 2.5 percent economic growth.

Manufacturers added workers in November, citing higher production targets as the main reason. Firms also raised their input purchases for the fifth time in as many months.

Firms continued to face sharp input price inflation on the back of higher raw material costs. But business confidence remained firmly positive as regards prospects of growth in the coming 12 months.

UK – Signs of progress in Britain's negotiations to leave the European Union mean the chance of a disorderly Brexit declined in the past month, a Reuters poll found, and the talks will probably end with a free trade deal.

Potentially heralding a breakthrough in the talks, Britain and the EU have reached agreement on a divorce bill and are close to agreement over the Northern Ireland border, newspapers reported this week.

So the chance of a disorderly Brexit - where no deal has been reached when the two years of talks are scheduled to close in March 2019 - has fallen to 25 percent from the 30 percent chance given in an October poll.

"With the UK ready to honour its full commitments in the Brexit bill, and a good chance that London and Dublin can strike a compromise on the Irish border question soon, we now see a lower risk that the UK and the EU will part company without a future trade deal by the March 2019 Brexit deadline," said Kallum Pickering at Berenberg.

The talks will probably end with a UK-EU free-trade agreement, an overwhelming majority of economists polled Nov. 27-30 said, as in previous Reuters polls.

"UK negotiators would be guilty of a dereliction of duty if they failed to agree a free-trade agreement - or at least to agree talks about talks," said Peter Dixon at Commerzbank.

Second most likely outcome, the poll found, was Britain leaving without a deal and instead trading with the continent under basic World Trade Organization rules.

Third was European Economic Area membership, under which Britain would pay to maintain full access to the EU Single Market. The least likely option was a reversal of the decision to leave the EU.

The sample was similar to in recent polls.

U.S. – St. Louis Fed President James Bullard warned on Friday of a key "bearish signal" emerging for the economy if the Fed continues raising interest rates as fast as policymakers currently intend, and called on his colleagues to move more cautiously in the drive to more normal monetary policy.

Bullard said that as it stands, within a year short-term interest rates, pushed higher by Fed action, may move above long-term interest rates -- an "inversion" of the yield curve that is classically taken as a signal of economic weakness.

It is unlikely that long-term rates will move higher on their own to keep pace with the Fed's moves on short-term rates, he said, which he felt should make the Fed slow down.

"The simplest way to avoid yield curve inversion in the near term is for policymakers to be cautious in raising the policy rate," Bullard said in a presentation to the Arkansas Economic Development Institute.

With the spread between one-year and 10-year Treasury bonds currently around 0.73, and the latest Fed forecasts showing three rate increases next year, the yield curve could invert during 2018.

"There is a material risk...if the (Federal Open Market Committee) continues on its present course," Bullard said. Inversion "is a naturally bearish signal...This deserves market and policymaker attention."

Fed officials are expected to raise rates at their upcoming December meeting, and update their outlook for 2018. Weak inflation has led to division among policymakers over whether they should slow the pace of rate hikes until it is clear that prices are going to recover.

Expected inflation is a key component of long-term bond prices since investors would want securities to hold value on an inflation-adjusted or "real" basis over time. That inflation weakness is another reason the yield curve may flip from its normal slope, which rewards investors with higher interest rates on longer-term securities.

The yield curve is "not infallible" as a predictor of the economy, Bullard said, and some researchers have argued that it is losing its usefulness as an economic signal given the global decline in interest rates.

But Bullard said policymakers and investors "need to take the possibility of a yield curve inversion seriously."

ASIAN STOCK INDICATORS – *Daily Outlook*

Japan's Nikkei share average rose for a third straight day on Friday, led by oil, steel and machinery stocks, while Sharp Corp soared after it announced a return to the bourse's main board.

The Nikkei ended 0.4 percent higher at 22,819.03 points, rising for three straight days. For the week, the index gained 1.2 percent.

The benchmark index dipped briefly earlier when sentiment was hit by news that the U.S. Senate had delayed voting on a Republican tax overhaul, and the news hurt sentiment during Asian trade.

Oil and steel stocks outperformed, with Showa Shell Sekiyu rising 2.0 percent and Nippon Steel & Sumitomo Metal Corp soaring 2.5 percent.

Machinery stocks also rallied. Minebea Mitsumi jumped 4.7 percent, while THK Co surged 3.4 percent.

Sharp Corp soared 7.9 percent after the company said that it will return to the Tokyo Stock Exchange first section on Dec. 7.

The company was demoted to the second section on Aug. 1, 2016 after booking negative net assets after it was hit by falling sales of smartphone panels and restructuring costs.

The broader Topix advanced 0.3 percent to 1,796.53.

The South Korean South Korea's KOSPI stock index weakened on Friday. The Korean won inched up in the local platform and bond yields rose.

At 06:30 GMT, the KOSPI was down 0.96 points or 0.04 percent at 2,475.41. The benchmark index fell 2.7 percent on a weekly basis, its biggest weekly loss since early August.

The won was quoted at 1,086.4 per dollar on the onshore settlement platform, 0.17 percent firmer than its previous close at 1,088.2.

In offshore trading, the won was quoted at 1,085.54 per U.S. dollar, up 0.11 percent from the previous day, while in one-year non-deliverable forwards it was being transacted at 1,083.05 per dollar.

MSCI's broadest index of Asia-Pacific shares outside Japan was down 0.05 percent, after U.S. stocks ended the previous session with mild gains. Japanese stocks rose 0.41 percent.

The KOSPI is up around 22.2 percent so far this year, and down by 0.13 percent in the previous 30 days.

The current price-to-earnings ratio is 12.10, the dividend yield is 1.28 percent and the market capitalisation is 1,242.04 trillion won.

The trading volume during the session on the KOSPI index was 284,017,000 shares, and of the total traded issues of 873, the number of advancing shares was 346.

Foreigners were net sellers of 244,378 million won worth of shares.

The U.S. dollar has fallen 10.01 percent against the won this year. The won's high for the year is 1,075.71 per dollar on November 29 2017 and low is 1,211.8 on January 3 2017.

In money and debt markets, December futures on three-year treasury bonds were unchanged at 108.26.

The Korean 3-month Certificate of Deposit benchmark rate was quoted at 1.65 percent compared with a previous close of 1.64 percent, while the

benchmark 3-year Korean treasury bond yielded 2.082 percent, higher than the previous day's 2.08 percent.

Hong Kong stocks fell on Friday, with the benchmark Hang Seng Index posting its biggest weekly loss in 11 months as investors booked profits from this year's robust rally.

Losses in mainland China stocks also pressured Hong Kong this week as regulators in Beijing continue to clamp down on riskier types of activity to reduce systemic risks in the financial system.

At close of trade, the Hang Seng index was down 103.11 points or 0.35 percent at 29,074.24. It fell 2.7 percent on the week, the biggest such drop since December 2016. The Hang Seng China Enterprises index fell 0.23 percent to 11,449.43.

The sub-index of the Hang Seng tracking energy shares rose 0.3 percent while the IT sector dipped 2.72 percent, the financial sector was 0.2 percent lower and property sector rose 0.52 percent.

The top gainer on Hang Seng was Wharf Holdings Ltd up 3.25 percent, while the biggest loser was Tencent Holdings Ltd which was down 2.66 percent.

China's main Shanghai Composite index closed up 0.02 percent at 3,317.8092 points while its blue-chip CSI300 index ended down 0.19 percent.

Around the region, MSCI's Asia ex-Japan stock index was barely changed while Japan's Nikkei index closed up 0.41 percent.

The yuan was quoted at 6.6078 per U.S. dollar at 08:12 GMT, 0.02 percent firmer than the previous close of 6.609.

So far this year, the Hang Seng index is up 32.62 percent, while China's H-share index is up 22.1 percent. The Hang Seng has risen 3.3 percent this month.

The top gainers among H-shares were China Vanke Co Ltd up 3.34 percent, followed by Sinopharm Group Co gaining 1.95 percent and GF Securities Co Ltd up by 1.28 percent.

The three biggest H-shares percentage decliners were Ping An Insurance Group Co of China Ltd which was down 1.75 percent, China Merchants Bank Co Ltd which fell 1.5 percent and Anhui Conch Cement Co Ltd down by 1.2 percent.

About 2.15 billion Hang Seng index shares were traded, roughly 110.9 percent of the market's 30-day moving average of 1.94 billion shares a day. The volume traded in the previous trading session was 2.51 billion.

At close, China's A-shares were trading at a premium of 30.89 percent over the Hong Kong-listed H-shares.

The price-to-earnings ratio of the Hang Seng index was 13.35 as of the last full trading day while the dividend yield was 2.9 percent.

So far this week, the market capitalisation of the Hang Seng index has fallen by 1.67 percent to HK\$18.80 trillion.

CURRENCIES – *Daily Outlook*

Dollar slumps on report ex-adviser Flynn to testify against Trump - Reuters News

The greenback slipped against a basket of currencies on Friday after ABC News reported that Michael Flynn, a former adviser to U.S. President Donald Trump, said he was prepared to testify that Trump directed him to make contact with the Russians when he was a presidential candidate.

The dollar index, which measures the greenback against six rival currencies, was down 0.15 percent at 92.903. Growing optimism that U.S. Senate Republicans would be able to pass a tax overhaul bill had sent the index as high as 93.248, but the index reversed course sharply on

the Flynn headlines.

Reuters could not immediately verify the ABC News report.

"To the extent that this headline further ensnares this administration into this investigation or suggests a widening of the Special Counsel's probe, I think that it is certainly a key concern for global investors and that's why we are seeing the dollar come off," said Omer Esiner, chief market analyst at Commonwealth Foreign Exchange in Washington.

Meanwhile, U.S. Senate Republicans said they had gathered the votes needed to pass a sweeping tax overhaul, after last-minute negotiations to ease some senators' concerns about the bill's impact on the federal deficit, healthcare and property taxes.

A final vote on the bill was expected later on Friday.

The dollar has grown very sensitive to the prospect of the passage of the tax bill in recent weeks and any perceived hurdles have been a source of anxiety for dollar bulls.

The euro remained slightly weaker against the dollar, despite data that showed global manufacturing expanded at the fastest pace in years last month and the second-fastest for two decades in the euro zone, driven by robust demand.

The single currency was down 0.09 percent to \$1.1891.

"The euro has had generally a good week, and it's almost a dynamic of buy the rumor, sell the fact," said Mazen Issa, senior FX strategist at TD Securities in New York.

Sterling slipped from a two-month high against the dollar, getting only a temporary boost from better-than-expected UK manufacturing data, as investors fretted about Britain reaching a deal with the European Union over the Irish border.

The Canadian dollar posted its biggest gain in about 20 months against its U.S. counterpart after stronger-than-expected domestic jobs data fueled expectations for further Bank of Canada interest rate hikes early next year. [\(Source Reuters, Research – @her1en\)](#)

Precious Metal – *Daily Outlook*

Gold briefly jumps 1.2 pct as Flynn probe roils markets - Reuters News

Gold jumped on Friday as the dollar and U.S. stocks fell on an ABC news report that former national security adviser Michael Flynn was prepared to tell investigators that Donald Trump directed him to make contact with Russians during last year's presidential election campaign. Shares on Wall Street fell immediately after the report. Investors feared the political news could affect whether the Senate will pass a tax bill backed by Trump.

Within moments, however, gold came off its highs and U.S. stocks bounced off lows. Michael Matousek, head trader at U.S. Global Investors in San Antonio, noted that

U.S. Senate Republican leader Mitch McConnell said there were enough votes to pass the tax bill in that chamber.

The report about Flynn "was a good catalyst for people who were anticipating buying gold. It sparked the fear trade," Matousek said. Reuters has not verified the ABC News report, which cited a Flynn confidant.

Spot gold was up 0.3 percent at \$1,278.01 an ounce by 1:39 p.m. EST (1839 GMT), after peaking to \$1,289.50. The yellow metal was poised to end the week 0.8 percent lower.

U.S. gold futures for February delivery settled up \$5.60, or 0.4 percent, at \$1,282.3 per ounce.

"Tax reform would be negative for gold," said Commerzbank analyst Carsten Fritsch, "because this will lead to higher inflation and more Fed rate hikes."

He said the recent weakness in gold could be attributed to an ongoing rally in global equity markets, boosted by "economic optimism and hopes regarding tax reform".

U.S. stocks this week hit record highs on bets that U.S. tax reforms would go through.

On Thursday, gold fell 0.7 percent to touch its lowest since Nov. 6 at \$1,270.11.

A lack of clear drivers has kept gold between \$1,265 and \$1,300 an ounce throughout November, its narrowest monthly range in 12 years.

Silver dipped 0.6 percent to \$16.33 after hitting \$16.22 an ounce, its lowest since Aug. 8. It was down 3.8 percent for the week.

Palladium rose 1.5 percent to \$1,021.60 and was up 2.4 percent for the week. Platinum was down 0.3 percent at \$938.40 an ounce and was off 0.2 percent on the week.

Separately, federal prosecutors said Flynn pleaded guilty to lying to the Federal Bureau of Investigation and also admitted to speaking with a top member of the Trump transition team regarding his communications with Russia's ambassador to the United States.

OIL – Daily Outlook

Oil settles up but off highs as Flynn news spooks Wall St - Reuters News

Oil prices settled up slightly on Friday, but came off session highs as financial markets reeled from an ABC News report that added to concerns about President Donald Trump's exposure to a probe into Russian meddling in last year's campaign.

Brent crude rose as high as \$64.32 a barrel, the day after OPEC and other crude producers agreed to extend output cuts until the end of 2018 to tighten global supplies and support prices.

But oil pared gains as Wall Street stocks slid following an ABC report that former national security adviser Michael Flynn was prepared to tell investigators that prior to taking office, Trump directed him to make contact with Russians.

Reuters has not verified the ABC News report, which cited a Flynn confidant. Flynn also pleaded guilty on Friday to lying to the FBI.

"Oil prices have pared earlier gains in tandem with losses seen in the equity market partly because (of) news regarding Michael Flynn," said Abhishek Kumar, Senior Energy Analyst at Interfax Energy's Global Gas Analytics in London.

Brent futures settled at \$63.73 a barrel, putting the new front month February contract up 16 cents from where January expired on Thursday. The February futures contract was up about 1.8 percent from where it closed in the previous session.

U.S. West Texas Intermediate crude gained 96 cents, or 1.7 percent, to settle at \$58.36 per barrel. WTI's January contract does not expire till Dec. 19.

Both benchmarks declined for the week, with Brent down less than 1 percent and U.S. down about 1 percent.

Before the Flynn news spooked Wall Street, crude prices were approaching their highest levels since the summer of 2015. On Thursday, the Organization of the Petroleum Exporting Countries and some non-OPEC producers led by Russia agreed to extend the output cuts.

The output cuts were due to expire next March. Producers have reduced output by about 1.8 million barrels per day (bpd). The latest agreement allows for producers to exit the deal early if the market overheats.

Russian officials had expressed concern that extending the output cuts might encourage rival U.S. shale firms to pump more crude.

"It leaves a question mark about the second half (of 2018) and about the commitment of Russian oil companies, which will be price dependent," Petromatrix strategist Olivier Jakob said.

The chief executive of Russia's top private producer Lukoil told Reuters he would like to see the price of oil stable at current levels, trading in the \$60-65 per barrel range.

Rising U.S. production has been a thorn in OPEC's side. On Friday, U.S. rig count data increased for a second straight week.

U.S. production rose to 9.5 million bpd in September, its highest monthly output since 9.6 million bpd in April 2015, according to federal energy data going back to 2005. On an annual basis, U.S. output peaked at 9.6 million bpd in 1970. [\(Source Reuters, Research – @her1en\)](#)
