GLOBAL MARKETS & ECONOMIES

GLOBAL MARKETS

U.S. & Global Markets – Wall Street led stocks higher globally on Thursday, more than offsetting declines in Asia, as an expected strong earnings season took front seat after U.S. President Donald Trump cast doubt over the timing of his threatened strike on Syria.

The risk of clashes between Western powers and Russia in Syria over an alleged chemical attack eased somewhat as Trump reworded his Wednesday threat that missiles "will be coming" while taunting Russia for supporting Syrian President Bashar al-Assad.

Trump wrote on Thursday that an attack on Syria "could be very soon or not so soon at all." Later, he said decisions will be made "fairly soon."

Investors turned their focus to U.S. corporate earnings as BlackRock, the world's largest asset manager, reported quarterly profit above Wall Street estimates with its shares up 1.5 percent.

BlackRock's results boosted bank shares, which were the largest gainers on Thursday, likely on bets that increased exchange traded funds trading will benefit their bottom lines. Higher U.S. Treasury yields also gave banks support.

Analysts expect quarterly profit for U.S. benchmark S&P 500 index companies to rise 18.4 percent from a year ago, the biggest gain in seven years, according to Thomson Reuters I/B/E/S.

"We're hearing less talk of firing missiles and less talk of trade war. Earnings are coming up and expectations are high," said Michael Antonelli, managing director of institutional sales trading at Robert W. Baird in Milwaukee. The stock market, he said, is "returning to normal."

The Dow Jones Industrial Average rose 293.6 points, or 1.21 percent, to 24,483.05, the S&P 500 gained 21.8 points, or 0.83 percent, to 2,663.99 and the Nasdaq Composite added 71.22 points, or 1.01 percent, to 7,140.25.

The pan-European FTSEurofirst 300 index rose 0.67 percent and MSCI's gauge of stocks across the globe gained 0.37 percent.

Emerging market stocks rose 0.11 percent. MSCI's broadest index of Asia-Pacific shares outside Japan closed 0.27 percent lower, while Japan's Nikkei lost 0.12 percent.

The higher risk appetite as geopolitical tensions eased boosted U.S. Treasury yields. The safe-haven Japanese yen also fell.

"There is less immediate concern about military strikes or action in Syria," said Jim Vogel, interest rates strategist at FTN Financial in Memphis.

"It doesn't move it to the back-burner, but it allows you to look around and trade other things and that gives room for rates to rise just a little bit from their sort of cramped or compressed levels," he said.

Benchmark 10-year Treasury notes last fell 14/32 in price to yield 2.8413 percent, from 2.79 percent late on Wednesday.

The 30-year bond last fell 26/32 in price to yield 3.0455 percent, from 3.005 percent late on Wednesday.

GLOBAL ECONOMIES

New Zealand – New Zealand will not grant any new permits for offshore oil and gas exploration, Prime Minister Jacinda Aheron said on Thursday, taking the industry by surprise with a decision that it says will push investment overseas.

The centre-left Labour-led government said the move would not affect the country's 22 existing exploration permits, and any oil and gas discoveries from firms holding those licenses could still lead to mining permits of up to 40 years.

Ardern, who campaigned heavily on preventing climate change in the run-up to last year's tight election, said the decision was a responsible step and provided certainty for businesses and communities.

"We have been a world leader on critical issues to humanity by being nuclear free...and now we could be world leading in becoming carbon neutral," she told university students in the country's capital, Wellington.

Interest in oil exploration in New Zealand has waned in recent years due to lower global oil prices, with only one permit issued in 2017, compared with 10 in 2014.

However, business and regional leaders said they had been blindsided by the move and feared the government was risking jobs in the NZ\$2.5 billion (\$1.8 billion) oil and gas industry.

National opposition Energy and Resources spokesman Jonathan Young said the decision would simply shift production elsewhere in the world, while Neil Holdom, mayor of the main city in the energy-rich Taranaki region, labelled it "a kick in the guts."

One of the country's main energy companies, New Zealand Oil & Gas said it had not been warned of the change.

"We note that the announcement is a sudden change of policy, which has not been consulted on and appears to conflict with the government's pre-election promises," it said in a statement.

The company, whose shares fell to six-month low, said the move would have no immediate material impact on its financial position, but it would invest in exploration and production assets in other jurisdictions.

The oil and gas industry accounts for only about 1.4 percent of New Zealand's economy, but the furore underscored the challenge faced by Labour - which has a support arrangement with the Green Party - in winning over the business sector.

Business sentiment has plummeted to multi-year lows since Labour took office, ending almost a decade of conservative National rule, despite companies reporting robust demand for their services.

While permits for searching for onshore oil and gas reserves will continue and existing offshore permits would not be touched, Ardern said the decision was about "setting our expectations for the future."

China – China's commerce ministry said on Thursday trade negotiations with the United States would be impossible as Washington's attempts at dialogue were not sincere, and vowed to retaliate should U.S. President Donald Trump escalate current tensions.

China President Xi Jinping on Tuesday vowed to open China's economy further and lower import duties on goods such as cars, which had boosted hopes for a compromise. Trump responded in a tweet saying he was "thankful" for Xi's remarks on tariffs and access for U.S. automakers, and said both countries would "make great progress together".

Commerce Ministry spokesman Gao Feng told reporters during a regular briefing, however, that Xi's remarks had nothing to do with the trade row and should not be mischaracterised as a concession to Washington.

"I hope some people in the U.S do not misjudge the situation," he said. "If the United States takes any action to escalate the situation, China will not hesitate to fight back."

The world's two largest economies have threatened each other with tens of billions of dollars' worth of tariffs in recent weeks, leading to worries that Washington and Beijing may engage in a full-scale trade war that could damage global growth and roil markets.

Some U.S. officials and analysts have said they believe the dispute could eventually be resolved via dialogue, but Beijing reiterated on Thursday that no formal talks have taken place.

"It is not a matter of whether China is willing to participate in the negotiations. It is about the U.S. not showing sincerity at all," Gao said.

China's Global Times tabloid wrote in a commentary that Washington can either respond sincerely to China's determination of opening up and launching goodwill interactions or keep pressuring China with unreasonable demands and escalate trade frictions.

Washington accuses Chinese firms of stealing the trade secrets of U.S. companies and forcing them into joint ventures to acquire their technology - the crux of Trump's current tariff threats against China. Beijing denies this charge.

Trump on Monday also criticised China for maintaining 25 percent import tariffs on autos compared to 2.5 percent duties of the U.S., calling the relationship not free trade but "stupid trade." But Gao said WTO rules do not require equal tariffs and demand for such parity is unreasonable.

He said China will continue opening its markets based on its own plans and implement lower tariffs pledged by Xi as soon as possible.

Japan – The Bank of Japan mostly held an optimistic view on regional economies, in a sign of its conviction over a broadening recovery but warned that labour shortages and a U.S.-China trade war could cloud the outlook.

The central bank's assessment in a report on Thursday suggests it will probably maintain its upbeat growth and price forecasts when it conducts a quarterly review of its projections at a rate review on April 26-27.

BOJ Governor Haruhiko Kuroda stressed his resolve to maintain the central bank's massive stimulus programme to achieve his elusive 2 percent inflation target, even as the economy continues to expand moderately.

"With the output gap improving and medium- to long-term inflation expectations seen heightening, we expect inflation to accelerate as a trend and head toward 2 percent," Kuroda told a quarterly meeting of the BOJ's regional branch managers on Thursday.

In the report issued by the BOJ's branch managers, the central bank upgraded its assessment for two of Japan's nine regions and maintained its rosy view for six areas as a tightening job market drove up household income and consumption.

It described six regional economies as "expanding" or "expanding moderately" - the most upbeat language it uses to describe the state of the economy - and cut its view on just one region.

A senior BOJ official told parliament on Thursday there were promising signs in the economy that would help the central bank meet its price goal.

"Medium- and long-term inflation expectations are recently emerging from weaknesses, while wages and inflation are rising moderately," said BOJ Executive Director Eiji Maeda.

Euro Zone – Euro zone industrial production was much weaker than expected in February, data showed on Thursday, pointing to slower economic growth in the first quarter and no quick policy tightening from the European Central Bank.

The European Union's statistics office Eurostat said industrial production in the 19 countries sharing the euro fell 0.8 percent month-on-month for a 2.9 percent year-on-year rise. Economists polled by Reuters had expected a 0.1 percent month-on-month increase and a 3.8 percent annual gain.

Eurostat also revised upwards its data for January to a 0.6 percent monthly decline from the previously reported -1.0 percent and to a 3.7 percent year-on-year rise from 2.7.

Industrial production accounts for some 20 percent of euro zone gross domestic product.

"Weak industrial production figures point to some growth deceleration in the first quarter. While there's no reason to panic yet, it seems as if GDP growth is already past its peak," ING economist Peter Vanden Houte said.

The weaker February result was due to falling production in all categories - intermediate goods, capital goods, durable and non-durable consumer goods -- except energy, the output of which surged 6.8 percent on the month after a 1.1 percent monthly decline in January.

Year-on-year, energy production rose 5.7 percent in February after an 8.9 percent plunge in January, but all other components showed a smaller annual rise compared with the month before.

Average quarterly growth in the euro zone in 2017 was 0.6 percent, but first-quarter growth would be lower, said Nicola Nobile, the lead euro zone economist at Oxford Economics.

"This will not bode well for GDP growth, which we now expect only expanding by 0.4 percent in the first quarter, 0.2 percentage points lower than the average quarterly growth rates for 2017. The 0.7 growth rates of mid-2017 now seem a thing of the past," Nobile said.

The moderation in growth momentum is likely to keep euro zone inflation subdued and well below the European Central Bank's target of below, but close to 2 percent over the medium term. Inflation in March was 1.4 percent year-on-year.

"In these circumstances the ECB is unlikely to become more hawkish. We expect a first rate hike at the earliest in June 2019," ING's Vanden Houte said.

Greece – Greece's jobless rate edged down to 20.6 percent in January from 20.8 percent the previous month, data from the country's statistics service ELSTAT showed on Thursday.

The unemployment rate hit a record 27.9 percent in September 2013 but has been gradually easing since then, although it remains the highest in the euro zone.

Seasonally adjusted data showed the number of unemployed at 977,222 people, with people aged up to 24 bearing the brunt of the joblessness.

Among those aged 15-24, the jobless rate eased to 42.3 percent from 47.1 percent in the same month in 2017.

The government expects unemployment to fall to 18.4 percent this year, based on projections in its 2018 budget.

Euro zone unemployment fell to a new nine-year low of 8.5 percent in February from 8.6 percent in January.

UK – Britain's economy has been treading water since the start of the year and inflation pressures are easing, limiting the case for the Bank of England to raise interest rates next month, the British Chambers of Commerce said on Thursday.

The BCC's quarterly economic survey - the largest of its kind - showed a familiar picture of lacklustre domestic demand, only partly mitigated by the boost to foreign demand from the fall in the value of the pound since June 2016's Brexit vote.

"What growth we see in the UK economy is due principally to strong global trading conditions, rather than domestic demand, which remains muted," the BCC's director-general, Adam Marshall, said.

Britain's economy recorded the weakest year-on-year growth of any major economy in late 2017, as consumers struggled with higher inflation caused by the weak pound, and more recent official data points to a further slowdown in early 2018.

However, the BoE said in February that the economy was close to reaching its capacity to grow without generating excessive inflation, leading investors to predict that a rate rise is coming next month.

Two of the BoE's nine policymakers voted for a rate rise at their last meeting in March, citing evidence of rising domestic inflation pressures in business surveys.

The BCC said this was not the experience of its members. Fewer firms expect to raise prices than in late 2017, and rising pay demands from workers were a problem for under a quarter of businesses, the survey showed.

"Inflation is now on a downward trajectory," BCC economist Suren Thiru said. "While we expect interest rates to rise next month, with UK economic conditions subdued and inflation weakening, the case for a further tightening in monetary policy continues to look limited at best."

Manufacturers in the BCC survey reported the fastest growth in export sales and orders since the second quarter of 2014. But domestic sales grew at the weakest rate since late 2016.

Services businesses reported steady domestic sales growth but only a minimal pick-up in the rate of export expansion.

"Even with a standout performance from manufacturing exporters able to reap the benefits of lower sterling, the UK economy as a whole is treading water, rather than powering ahead," Marshall said.

The BCC surveyed more than 7,000 businesses from Feb. 19 to March 12, before Prime Minister Theresa May reached a provisional agreement with the European Union on trading terms after Britain leaves the bloc in just under a year.

U.S. – New applications for U.S. unemployment benefits fell last week, pointing to sustained labor market strength despite a sharp slowdown in job growth in March.

Other data on Thursday showed import prices were unexpectedly flat in March as a drop in the cost of petroleum products was offset by increases in the prices of food and a range of other goods. A tightening labor market is expected to boost wage growth and help drive up inflation this year.

Initial claims for state unemployment benefits dropped 9,000 to a seasonally adjusted 233,000 for the week ended April 7, the Labor

Department said. Economists polled by Reuters had forecast claims falling to 230,000 in the latest week.

Claims tend to be volatile around this time of year because of different timings of the Easter and school spring breaks, which can throw off the model that the government uses to smooth the data for seasonal fluctuations.

The economy created 103,000 jobs in March, the fewest in six months. Economists largely dismissed the slowdown as payback after hefty job gains in February. They also blamed cooler temperatures for the moderation in hiring.

The labor market is considered to be near or at full employment. The unemployment rate is at a 17-year low of 4.1 percent, not too far from the Federal Reserve's forecast of 3.8 percent by the end of this year.

Minutes of the U.S. central bank's March 20-21 policy meeting published on Wednesday offered an upbeat assessment of the jobs market, noting that "most participants described labor market conditions as strong."

The minutes also highlighted growing labor shortages saying "in some districts, reports from business contacts or evidence from surveys pointed to continuing shortages of workers in segments of the labor market."

The Fed raised interest rates last month and forecast at least two more rate hikes this year.

The four-week moving average of initial claims, viewed as a better measure of labor market trends as it irons out week-to-week volatility, rose 1,750 to 230,000 last week.

The dollar held gains versus a basket of currencies after the data while prices for U.S. Treasuries fell slightly.

ASIAN STOCK INDEX

Japanese stocks pulled back on Thursday as worries about possible U.S. military action against Syria curbed investor risk appetite, while earnings reports kept the retail sector in the spot light.

The Nikkei share average ended Thursday down 0.1 percent at 21,660.28.

There were 57 advancers on the benchmark index against 159 decliners.

Investors were generally cautious as tensions ran high after U.S. President Donald Trump warned Russia of imminent military action in Syria over a suspected poison gas attack.

Domestically the retail sector was in focus on the back of their earnings releases.

Convenience store operator Lawson Inc tumbled 4.9 percent after the company forecast an 8.8 percent drop in its operating profit year through February 2019 as it continued to invest in new businesses.

On the other hand, supermarket operator Aeon climbed more than 4 percent after it posted a record annual operating profit and forecast a further gain.

Household goods retailer Ryohin Keikaku jumped more than 5 percent with the company expecting a 10.6 percent rise in its net profit for the year through February 2019 thanks to strength in domestic and overseas businesses.

Other winners included mining shares, driven by crude oil prices racing to its highest since late 2014, though airlines shares fell on worries about higher fuel charges.

Japan Petroleum Exploration Co gained 3 percent and Japan Drilling Co rose 5.2 percent.

Japan Airlines fell 1.2 percent and ANA Holdings dropped 0.7 percent.

The broader Topix slid 0.4 percent to 1,718.52.

South Korea's KOSPI stock index was muted on Thursday while the won weakened against the dollar in the local platform and bond yields fell.

The Bank of Korea held its benchmark interest rate steady on worries over soft inflation amid trade tensions between the United States and China. The bank's decision had little impact on financial markets as was largely expected.

At 06:33 GMT, the KOSPI was down 1.51 points or 0.06 percent at 2,442.71.

The won was quoted at 1,069.5 per dollar on the onshore settlement platform, 0.3 percent weaker than its previous close at 1,066.3.

In offshore trading, the won was quoted at 1,068.74 per U.S. dollar, down 0.27 percent from the previous day, while in one-year non-deliverable forwards it was being asked at 1,054.45 per dollar.

MSCI's broadest index of Asia-Pacific shares outside Japan was down 0.45 percent, after U.S. stocks ended the previous session with losses Japanese stocks fell 0.12 percent.

The KOSPI is down around 0.9 percent so far this year and has shed 0.49 percent in the last 30 days.

The current price-to-earnings ratio is 12.10, the dividend yield is 1.28 percent and the market capitalisation is 1,242.04 trillion won.

The Korean 3-month Certificate of Deposit benchmark rate was quoted at 1.65 percent, while the benchmark 3-year Korean treasury bond yielded 2.156 percent, lower than previous day's 2.17 percent.

Hong Kong stocks shed early gains to end lower on Thursday, as caution prevailed amid rising tensions in the Middle East following the threat of imminent U.S. military action in Syria.

The Hang Seng index closed down 0.2 percent at 30,831.28 points, while the China Enterprises Index ended 0.3 percent lower at 12,288.86.

U.S. president Donald Trump declared that missiles "will be coming" in Syria, taunting Russia for supporting Syrian President Bashar al-Assad after a suspected chemical attack on rebels.

His comments raised the prospect of direct conflict over Syria for the first time between the two world powers backing opposing sides in the seven-year-old civil war, which has also escalated a rivalry between Saudi Arabia and Iran.

Adding to the pressure was the lingering concern over the trade spat between China and the United States.

China's commerce ministry said on Thursday trade negotiations with the United States would be impossible as Washington's attempts at dialogue were not sincere, and vowed to retaliate should U.S. President Donald Trump escalate current tensions.

The top gainer on Hang Seng was CNOOC Ltd, which ended 3.66 percent higher, while the biggest loser was Galaxy Entertainment Group Ltd, which closed down 2.88 percent. Around the region, MSCI's Asia ex-Japan stock index slipped 0.32 percent, while Japan's Nikkei index closed down 0.12 percent.

China stocks ended lower on Thursday, weakened by financial and transport stocks, as investors were rattled about possible U.S. military action against Syria.

The blue-chip CSI300 index ended down 1 percent to 3,898.64 points, while the Shanghai Composite Index closed 0.9 percent lower at 3,180.16.

U.S. president Donald Trump declared that missiles "will be coming" in Syria, taunting Russia for supporting Syrian President Bashar al-Assad after a suspected chemical attack on rebels.

His comments raised the prospect of direct conflict over Syria for the first time between the two world powers backing opposing sides in the seven-year-old civil war, which has also escalated a rivalry between Saudi Arabia and Iran.

Main sectors fell across the board, with both banking and transport firms ending down 1.5 percent.

CURRENCIES – Daily Outlook**Dollar up against yen, Swiss franc as risk appetite returns - Reuters News**

The dollar snapped a four-day losing streak against a basket of major currencies on Thursday, as worries about the threat of an imminent clash between Western powers and Russia in Syria lessened.

The dollar index, which measures the greenback against a basket of six other major currencies, was up 0.21 percent at 89.758 after falling about 1 percent over four straight days.

U.S. President Donald Trump, who warned on Wednesday of immediate military action in Syria in response to a suspected poison gas attack, assuaged some fears after amending the warning on

Thursday, saying a military strike "could be very soon or not so soon at all."

Trump said he was holding meetings on Thursday on Syria and expected to make decisions "fairly soon."

The threat of imminent military action piled pressure on investors already rattled by a trade dispute between the United States and China.

"It's a reversal of the safe-haven trade that lifted the yen and the Swiss franc earlier in the week," said Karl Schamotta, director of global product and market strategy at Cambridge Global Payments in Toronto.

"The primary reason for that is the dialing down of rhetoric from President Trump," he said.

The dollar was up 0.48 percent against the Swiss franc and 0.4 percent higher against the Japanese yen. The Swiss and Japanese currencies are often sought in times of global tension partly because the countries have big current account surpluses.

Data on Thursday showed new applications for U.S. unemployment benefits fell last week, pointing to sustained labor market strength.

"It dovetails with what we saw in the Fed minutes yesterday, really suggesting that the Fed is on autopilot at this point toward quarterly rate hikes in the year ahead," said Schamotta.

The euro was down 0.3 percent at \$1.2328 after minutes from the European Central Bank's meeting in March showed that policymakers expressed concern over the risk of a full-fledged trade war with the United States and fretted over the potentially harmful impact of the euro's strength.

Investors were also concerned about a downturn in Purchasing Managers' Indexes across the euro area, Schamotta said.

"It very much looks like the euro area is losing some of the momentum that was carrying the currency higher over the last year and a half," he said.

Euro zone businesses rounded off the first quarter of 2018 with their slowest growth in over a year, as new business took another hit from a stubbornly strong euro, a survey in March showed.

To be sure, some market participants view the slowdown as temporary.

"In recent weeks, we see pretty good signs of slowing in Europe and Asia. We think this is a soft patch not a sustained downturn. This might last a couple of months," said Alessio de Longis, portfolio manager for OppenheimerFunds' global multi-asset group, in New York.

With the euro weak, sterling rose to a nine-month high against the single currency. Against the dollar, the pound was up 0.35 percent at \$1.4226.

Cryptocurrency prices increased, led by a surge in bitcoin to two-week highs, with people active in the market citing a squeeze on traders who have bet against prices, given a lack of obvious news to trigger the gains. [\(Source Reuters, Research – @her1en\)](#)

Precious Metal – *Daily Outlook*

Gold falls from 11-week high on stronger dollar, profit-taking - Reuters News

Gold retreated from an 11-week high on Thursday, with investors booking profits as the U.S. dollar gained, but bullion's losses were limited as investors remained worried about rising military tensions in Syria and lingering concerns of a trade war with China.

Snapping a four-day winning streak, spot gold fell 1.1 percent at \$1,337.55 per ounce by 1:40 p.m. EDT (1740 GMT). U.S. gold futures for June delivery settled down \$18.10, or 1.3 percent, at \$1,341.90.

The dollar index gained against a basket of currencies, dragging commodities priced in the greenback.

"There's profit-taking and a little recovery in the equity markets," said Chris Gaffney, president of world

markets at EverBank. "There's still a good solid floor underneath the precious metals with Syria and trade tensions with China, so I think we've got a floor around \$1,340."

Underpinning bullion was news that British ministers planned to gather to discuss whether to join the United States and France in possible military action in Syria that could bring direct confrontation between Western and Russian forces.

On Wednesday, U.S. President Donald Trump warned Russia of imminent military action in Syria over a suspected gas attack, declaring that missiles "will be coming" and lambasting Moscow for standing by Syrian President Bashar al-Assad.

Gold is often used as a store of value during times of financial or political uncertainty, generally gaining along with assets such as the Japanese yen and U.S. Treasuries.

"Expectations are that \$1,350 will act as an initial pivot point for near-term pricing," said MKS SA precious metals trader Sam Laughlin.

"However, more importantly, key downside support around \$1,335 to \$1,340 should provide a base for a further test through the January high of \$1,366."

The U.S. economy showed signs of strength, minutes from the last Federal Reserve meeting showed on Wednesday, increasing the likelihood of U.S. interest rates hikes that could pressure prices of non-yielding gold.

Silver fell 0.8 percent to \$16.49 an ounce after hitting its highest in nearly two months at \$16.87 in the previous session.

Platinum added 0.3 percent to \$928.80 per ounce. Palladium fell 0.2 percent to \$962.22, but has surged by more than 6 percent so far this week on concerns supply from top producer Russia could be hurt by U.S. sanctions.

U.S. sanctions were likely an initial trigger for a price rally, UBS said in a note, but palladium was still supported by strong fundamentals.

OIL – Daily Outlook**Oil steady, near 3-year highs on Syria tensions, tighter supply - Reuters News**

Oil prices held steady on Thursday, remaining close to highs last reached in late 2014 on tensions over Syria and shrinking global oil inventories.

Brent crude futures settled at \$72.02 a barrel, down 4 cents. U.S. WTI crude futures were up 25 cents at \$67.07. Prices for both climbed in post-settlement trading.

"We're pretty much holding steady on yesterday's gains ... and it does look like there's further upside ahead," said Walter Zimmerman,

chief technical analyst at United-ICAP. "People are still nervous about what's going to happen in Syria ... nothing was solved overnight."

Oil prices jumped on Wednesday to their highest level since late 2014 after Saudi Arabia said it intercepted missiles over Riyadh and U.S. President Donald Trump warned of military action in Syria, both of which raised concerns about possible supply disruptions.

Some fundamental signals also supported prices. The Organization of the Petroleum Exporting Countries said the global oil stocks surplus was close to evaporating due to healthy demand and its own supply cuts.

The group is producing oil below its targets, meaning the world needs to use stocks to meet rising demand. OPEC said in its monthly report oil stocks in the developed world fell by 17.4 million barrels in February to 2.854 billion barrels, around 43 million barrels above the latest five-year average.

OPEC Secretary-General Mohammad Barkindo told Reuters in New Delhi the global oil glut had effectively shrunk by nine-tenths since the start of 2017.

"We have seen an accelerated shrinkage of stocks in storage from unparalleled highs of about 400 million barrels to about 43 million above the five-year average," Barkindo said.

OPEC, Russia and several other non-OPEC producers began trimming supply in January 2017. Their pact runs until the end of the year and OPEC meets in June to decide on its next course of action.

"There is growing confidence that the declaration of cooperation will be extended beyond 2018," Barkindo told Reuters. "Russia will continue to play a leading role."

These bullish factors more than offset pressure from a U.S. government report showing crude oil inventories rose by 3.3 million barrels, while production hit a record 10.53 million barrels per day (bpd).

Still, analysts were waiting for further fundamental signals. "This all depends on whether demand will be as strong as it is projected to be," said Gene McGillian, manager of market research at Tradition in Stamford.
