GLOBAL MARKETS

U.S. & Global Markets – World stock markets slipped on Tuesday, giving back early gains as Wall Street pulled back from initial highs after a decline in oil and metals dragged energy and materials stocks lower.

Wall Street had opened higher, as the Dow breached the 26,000 mark for the first time. The healthcare sector, up 0.46 percent, provided support to the upside, with Merck up 5.8 percent and UnitedHealth up 1.9 percent.

UnitedHealth posted quarterly results that topped analyst estimates and raised its 2018 outlook, bolstering optimism for another solid quarter for corporate earnings.

Earnings growth for the quarter is forecast at 11.9 percent, according to Thomson Reuters data through Tuesday morning.

But each of the major Wall Street indexes fell into negative territory as materials, down 1.2 percent and energy, off 1.2 percent, slumped.

Market participants cited skittishness over a possible U.S. government shutdown at the end of the week as the impetus behind the pullback in areas that have rallied of late.

"Look at what has happened to commodities, the dollar has collapsed, commodities have exploded, they have done nothing but go straight up," said Ken Polcari, Director of the NYSE floor division at O'Neil Securities in New York.

"The minute there is any catalyst that makes anyone a little bit nervous they take some money in the really good performers."

Oil prices eased from three-year highs as traders booked profits from the rally but healthy demand underpinned prices near \$70, a level not seen since 2014's market slump.

U.S. crude settled down 0.9 percent at \$63.73 per barrel and Brent was last at \$69.15, down 1.6 percent on the day.

Copper lost 1.37 percent to \$7,111.50 a tonne, touching a 3-1/2 week low following strong gains late last year and as worries lingered over fading demand in China.

The Dow Jones Industrial Average fell 10.33 points, or 0.04 percent, to 25,792.86, the S&P 500 lost 9.8 points, or 0.35 percent, to 2,776.44 and the Nasdaq Composite dropped 37.38 points, or 0.51 percent, to 7,223.69.

Citigroup shares rose 0.4 percent to \$77.11 after earnings topped expectations, the latest major U.S. bank to post results for the fourth quarter. The S&P financial index is up nearly 5 percent to start the year.

Shares in Europe closed little changed as commodity stocks also weighed.

The pan-European FTSEurofirst 300 index percent and MSCI's gauge of stocks across the globe shed 0.09 percent after hitting a record for a third straight session.

The euro held close to a three-year high against the dollar on Tuesday, as the common currency recovered from earlier losses tied to doubts that the European Central Bank would back away from its pledge to keep buying bonds at next week's meeting, up 0.03 percent to \$1.2265 while the dollar remained near three-year lows.

U.S. long-dated Treasury yields edged up as equities retreated. Benchmark 10-year notes last rose 3/32 in price to yield 2.5426 percent, from 2.552 percent late on Friday. ([Source Reuters – @her1en](#))

GLOBAL ECONOMIES

New Zealand – New Zealand business sentiment turned negative and sunk to a two-year low in the fourth quarter due to pessimism towards the new centre-left government, a private think tank said on Tuesday.

A net 12 percent of firms surveyed expected general business conditions to deteriorate compared with 5 percent who had forecast an improvement the previous quarter, according to the New Zealand Institute of Economic Research (NZIER).

The quarterly survey of business opinion (QSBO) posted the most downbeat result since September 2015, which NZIER said was largely driven by firms' negativity towards the Labour-led coalition government taking the helm in October and ending almost a decade of centre-right National Party rule.

"Businesses may be worried about the outlook for the New Zealand economy under the new Labour-led government, but for now that is not

reflected in demand in their own businesses," said Christina Leung, principal economist at NZIER.

She said that historically business confidence dropped when Labour took office, given they were perceived as less "pro-business" than the National Party.

Labour swept to power under charismatic 37-year-old leader Jacinda Ardern, who promised to reduce poverty and inequality by curbing speculation in the housing market and placing restrictions on foreign investment and immigration.

Leung said the politically fuelled drop in sentiment had traditionally not had much impact on businesses' own operations.

"It's more a sentiment story," she said, adding that meant the Reserve Bank of New Zealand (RBNZ) was unlikely to push back rate hikes due to waning business confidence.

"Overall we don't expect this will change the RBNZ's thinking about what's going on in the NZ economy, activity indicators are holding up," she said.

The central bank has signalled it will keep rates on hold at a record low of 1.75 percent, possibly until 2020, while inflation stabilises, though the NZIER forecast a rate hike as soon as November 2018.

A net 31 percent of businesses said they expected to lift prices in the coming months, a three-year high.

Leung said a severe skilled labour shortage, particularly in the construction sector, would also eventually filter through to a pick up in wage growth.

"We're not seeing the wage growth yet, but do expect that will pick up over the next few years," she said.

The survey's measure of capacity utilisation was 92.8 percent, from the previous quarter's 91.3 percent.

The New Zealand dollar edged down to \$0.7299 after the release from around \$0.7306.

China – China's economy is expected to cool this year as a government-led crackdown on debt risks and factory pollution drag on overall activity, a Reuters poll showed on Tuesday.

Beijing is in the second year of a relentless campaign to wean China off its debt-heavy investment model, clamping down on everything from speculative property lending to shadow-bank financing activities as policy makers look to foster sustainable longer term growth.

That has pushed up borrowing costs and taken some of the momentum off the world's second-largest economy, especially in the final months of 2017, with growth forecast at 6.5 percent this year, according to economists from 70 institutions surveyed by Reuters.

It was slightly above the poll's October forecast of 6.4 percent expansion, but would still lag the survey's 2017 projection of a 6.8 percent gross domestic product increase.

A government-led infrastructure spending spree, which partly contributed to better-than-expected growth last year, may "fare below expectations" due to tighter financial scrutiny, said Zhang Yiping, an analyst with China Merchant Securities.

A crackdown on factory pollution, which has shaved industrial output, is also expected to dent the broader economy. "Probably you're going to have a compounding impact on growth from all these piecemeal policies," said Qu Hongbin, Greater China Chief Economist at HSBC.

"Separately they all look great, but when you put that together at the same time, you may end up with even greater downward pressure on growth than the policymakers like to see."

China will keep its target for economic growth at "around 6.5 percent" in 2018, unchanged from last year, policy sources have told Reuters.

The country will announce Q4 and 2017 GDP growth on Thursday.

Analysts expect the People's Bank of China (PBOC) to keep its benchmark lending rate unchanged at 4.35 percent through at least the second quarter of 2019, the Reuters poll showed.

They have, however, pushed back their expectations on a cut in the amount of cash that banks are required to hold as reserves - the reserve requirement ratio (RRR).

The central bank is forecast to cut the RRR for all banks by 25 basis points (bps) in the fourth quarter of 2018 to 16.75 percent, versus the October poll's prediction for a 50-bps cut in the second quarter this year.

The poll predicted annual consumer inflation to be more pronounced at 2.3 percent in 2018, up from the 2.2 percent estimated in the October survey due to rising services prices. The higher rate could remain through to 2019, the poll showed.

Japan – Japanese Finance Minister Taro Aso said on Tuesday that he did not see problems with the dollar weakening to around 110.80 yen, but that big swings in currencies would be problematic.

Aso also said that he appreciated Bank of Japan Governor Haruhiko Kuroda's efforts towards achieving its 2 percent inflation target, raising expectations that the central bank chief is likely to be reappointed when his five-year term ends in April.

"The global economy is steadily growing as a whole. With the dollar at around 110.80 yen, I don't think it is a big deal," Aso said, when asked about impact of dollar depreciation on Japan and the rest of the world.

"The biggest problem would be sudden up and down movements in currencies. I don't see problems as long as currency moves are steady," he added.

The dollar hit a four-month low of 110.58 yen on Monday after Kuroda's upbeat economic view raised expectations the BOJ could dial back stimulus earlier than expected - a view that heightened after a slight cut in its debt purchases last week.

Despite speculation about normalisation of monetary policy, Aso urged the central bank to continue its monetary stimulus.

"The Bank of Japan has been continuing its efforts to defeat deflation and patiently trying to achieve the price stability target under Governor Kuroda, so we appreciate it."

Economy Minister Toshimitsu Motegi stuck to government's standard line that foreign exchange rates are decided by the market based on various factors, when asked about the recent rise in the yen and whether the Bank of Japan triggered it.

"I want to closely monitor the impact that moves in foreign exchange and other financial markets have on Japan's underlying economy," he said.

Euro Zone – Borrowing costs across the euro area extended their falls on Tuesday, after the ECB's Francois Villeroy de Galhau said the bank must keep an eye on the euro exchange rate because of the downward pressure it puts on inflation.

The euro fell to a session low of \$1.2195 after Villeroy's comments and the single currency was last down 0.5 percent at \$1.22.

German's 10-year government bond yield hits the day's low of 0.48 percent, down 5 basis points on the day, while 30-year Bund yields were set for the biggest 1-day fall since December 1.

Villeroy told German newspaper Boersen Zeitung that the ECB remained confident that euro zone inflation was moving towards its target of close to two percent even though underlying inflation has held steady for three months at 0.9 percent.

Bond yields across the region had already fallen based on a source-based report by Reuters earlier on Tuesday that the ECB is unlikely to ditch a pledge to keep buying bonds at next week's meeting.

U.K. – British inflation eased off its post-Brexit vote high in December, official data showed on Tuesday, suggesting the financial squeeze on many households could be about to get a little bit easier.

Consumer price inflation fell for the first time since June, slipping to annual rate of 3.0 percent, as expected by economists, from November's nearly six-year high of 3.1 percent.

Inflation jumped in Britain after voters decided in June 2016 to leave the European Union, a move that hammered the value of the pound and pushed up the cost of imports.

In the euro zone, inflation was just 1.4 percent in December, less than half the rate in Britain.

The combination of high inflation and slow wage growth - as well as uncertainty about the terms on which Britain will leave the EU in 2019 - is likely to mean that Britain again grows more weakly than other European economies this year.

Consumer price growth looks set to wane as the peak impact from sterling's sharp fall in mid-2016 drops out of the data.

But the Office for National Statistics said it could not yet declare that inflation was definitely on the slide.

"It remains too early to say whether today's slight fall is the start of any longer-term reduction in the rate of inflation," James Tucker, an ONS statistician, said.

Tuesday's official data showed growth in food prices slowed in December while airline fares rose less strongly than a year earlier, also pushing down on the overall inflation rate.

However, pressure in the pipeline grew as factory gate prices rose, confounding predictions of a fall.

ASIAN STOCK INDEX

Japan's Nikkei share average rose to its highest level since late 1991 on Tuesday, as a firmer dollar supported exporter stocks and expectations for strong corporate earnings bolstered investor sentiment.

The Nikkei ended 1 percent higher at 23,951.81 after reaching an intraday peak of 23,962.07, its highest since November 1991. The index had slipped to as low as 23,588.07 on Friday when the dollar took a steep dive versus its Japanese peer.

"The yen's appreciation against the dollar has stopped and this brightened sentiment, along with expectations for robust company quarterly results," said Masahiro Ichikawa, senior strategist at Sumitomo Mitsui Asset Management.

Information technology service provider Obic Co rose as much as 7.9 percent to an 18-year peak after the Nikkei business daily reported that the company's operating profit for the nine months through December likely rose by a fifth.

Exporters were lifted as the dollar on Tuesday bounced back from four-month lows versus the yen.

Toyota Motor Corp added 1.05 percent, Tokyo Electron rose 1.6 percent and Panasonic Corp climbed 0.6 percent.

The broader Topix rose 0.55 percent to 1,894.25.

Out of Tokyo's 33 subindexes, 22 were in positive territory, led by fish and forestry and electrical machinery Iron and steel and sea transport led the losing sectors.

South Korea's KOSPI stock index rose on Tuesday. The Korean won was unchanged and bond yields were steady.

At 06:30 GMT, the KOSPI was up 18.01 points or 0.72 percent at 2,521.74.

The won was quoted at 1,062.7 per dollar on the onshore settlement platform, identical with its previous close at 1,062.7.

In offshore trading, the won was quoted at 1,061.87 per U.S. dollar, up 0.05 percent from the previous day, while in one-year non-deliverable forwards it was being transacted at 1,054.17 per dollar.

MSCI's broadest index of Asia-Pacific shares outside Japan was up 0.53 percent. Japanese stocks rose 1 percent.

The KOSPI is up around 1.5 percent so far this year, and up by 0.36 percent in the previous 30 days.

The current price-to-earnings ratio is 12.10, the dividend yield is 1.28 percent and the market capitalisation is 1,242.04 trillion won.

The trading volume during the session on the KOSPI index was 337,355,000 shares, and of the total traded issues of 886, the number of advancing shares was 381.

Foreigners were net buyers of 276,843 million won worth of shares.

The Korean 3-month Certificate of Deposit benchmark rate was quoted at 1.66 percent compared with a previous close of 1.66 percent, while the benchmark 3-year Korean treasury bond yielded 2.225 percent, barely changed from the previous day's 2.22 percent.

Hong Kong's benchmark Hang Seng Index rose to a record closing high on Tuesday, led by index heavyweight Tencent Holdings and Hong Kong Exchanges and Clearing (HKEx).

Tencent jumped over 2 percent while HKEx surged nearly 6 percent

At close of trade, the Hang Seng index was up 565.88 points or 1.81 percent at 31,904.75. The Hang Seng China Enterprises index rose 2.54 percent to 12,787.28.

The sub-index of the Hang Seng tracking energy shares rose 1.1 percent while the IT sector rose 2.04 percent, the financial sector was 2.39 percent higher and property sector rose 1.11 percent.

Around the region, MSCI's Asia ex-Japan stock index was firmer by 0.54 percent while Japan's Nikkei index closed up 1.00 percent.

The yuan was quoted at 6.4348 per U.S. dollar at 08:14 GMT, 0.02 percent firmer than the previous close of 6.4363.

So far this year, the Hang Seng index is up 4.75 percent, while China's H-share index is up 6.5 percent. As of the previous close, the Hang Seng has risen 4.75 percent this month.

China stocks rallied on Tuesday, with the blue-chip index closing at a 30-month high, led by a surge in real estate firms, even as a poll backed expectations that growth in the Asian economic powerhouse will slow in 2018.

China's economy is expected to cool this year as a government-led crackdown on debt risks and factory pollution drag on overall activity, a Reuters poll showed on Tuesday.

At the close, the Shanghai Composite index was up 27.00 points or 0.79 percent at 3,437.48.

The blue-chip CSI300 index was up 0.81 percent, with its financial sector sub-index higher by 1.63 percent, the consumer staples sector down 0.12 percent, the real estate index up 7.45 percent and healthcare sub-index up 1.25 percent.

The smaller Shenzhen index ended up 0.72 percent and the start-up board ChiNext Composite index was weaker by 0.17 percent.

Around the region, MSCI's Asia ex-Japan stock index was firmer by 0.48 percent while Japan's Nikkei index closed up 1.0 percent.

At 07:02 GMT, the yuan was quoted at 6.4331 per U.S. dollar, 0.05 percent firmer than the previous close of 6.4363.

So far this year, the Shanghai stock index is up 3.12 percent, the CSI300 is up 5.7 percent, while China's H-share index listed in Hong Kong is up 6.5 percent.

About 21.15 billion shares were traded on the Shanghai exchange, roughly 130.7 percent of the market's 30-day moving average of 16.18 billion shares a day. The volume in the previous trading session was 23.20 billion.

As of 07:03 GMT, China's A-shares were trading at a premium of 28.68 percent over the Hong Kong-listed H-shares.

The Shanghai stock index is above its 50-day and 200-day moving averages.

The price-to-earnings ratio of the Shanghai index was 15.48 as of the last full trading day while the dividend yield was 1.9 percent.

So far this week, the market capitalisation of the Shanghai stock index has fallen by -0.32 percent to 30.01 trillion yuan.

CURRENCIES – Daily Outlook**Euro hovers near three-year high, bitcoin tumbles - Reuters News**

The euro held close to a three-year high against the dollar on Tuesday, as the common currency recovered from earlier losses tied to doubts that the European Central Bank would back away from its pledge to keep buying bonds at next week's meeting.

Digital currencies tumbled, with bitcoin dropping as much as 18 percent to a four-week low near \$11,000 after reports suggested it was still possible that South Korea could ban trading them, which intensified fears of a wider regulatory crackdown.

Sources close to the ECB told Reuters that the central bank was unlikely to tweak its policy message so soon, as rate setters need more time to assess the outlook

for the economy and the euro.

"For ECB policymakers, they are thinking 'We have to be careful to not feed into this run,'" said Dragah Maher, U.S. head of FX strategy at HSBC Securities in New York.

The dollar gained against the euro on the Reuters report. The greenback's recovery was also stoked by anxiety over whether German Chancellor Angela Merkel would manage to form a "grand coalition" to govern.

Members of the center-left Social Democrats (SPD) in one of Germany's regions voted against talks with Merkel's conservative Christian Democrats (CDU) on Monday, and fresh headlines on that development triggered a fall in the euro in early European trading on Tuesday.

The euro was up 0.06 percent at \$1.2268.

Its weakness against the dollar dissipated as Wall Street stocks turned lower on profit-taking that emerged after the Dow hit the 26,000 mark for the first time.

The reversal on U.S. stocks kindled safehaven demand for the yen and Swiss franc.

The dollar was down 0.18 percent at 110.32 yen, while the greenback was down 0.45 percent at 0.9586 franc per dollar.

The euro's decline did not dent bullish sentiment for more gains in the coming months.

Speculators boosted net long positions in the euro to a record high in the week to Jan. 12, according to futures data published on Friday.

The dollar's index against a basket of six major currencies was down 0.05 percent at 90.398. It was up from Monday's three-year low of 90.279.

"A lot of the dollar's early strength was just short-coming. There's a lot of heavy bias for dollar weakness," said Lennon Sweeting, chief market strategist at XE in Toronto.

Fears of stricter government oversight sparked a broad sell-off in digital currencies.

Cryptocurrencies ethereum and ripple were down 19 percent and 29 percent, respectively. Most cryptocurrencies posted double digit losses, according to Coinmarketcap.

Precious Metal – *Daily Outlook***Gold eases from four-month peak as dollar claws back - Reuters News**

Gold slipped on Tuesday from the previous day's four-month high, reflecting losses across the commodities complex as the U.S. dollar clawed back some losses the day after hitting a three-year low against a basket of currencies.

Gold's move lower came after four consecutive days of gains due to the greenback's retreat, which made dollar-priced gold cheaper for holders of other currencies.

Spot gold was down 0.2 percent at \$1,337.04 an ounce by 1:35 p.m. EST (1835 GMT), off Monday's \$1,344.44 peak. U.S. gold futures for February

delivery settled up \$2.20, or 0.2 percent, at \$1,337.10 per ounce.

"The gold market has gained a lot of momentum over the last few sessions to the upside, so it's understandable that it's taking a breather on profit-taking," said Phillip Streible, senior commodities strategist at RJO Futures in Chicago.

In early trading, the dollar rose against the euro. On Monday the dollar hit its lowest against the single currency since late 2014.

The greenback has weakened as markets have grown more confident that a global recovery would outpace U.S. growth.

Stock market strength also weighed on gold, said George Gero, managing director of RBC Wealth Management. Equities continued to climb as the Dow Jones Industrial Average topped 26,000 for the first time.

Gero added that broad commodity weakness also weighed on gold prices. U.S. wheat futures fell as did crude oil and copper, while nickel slid more than 5 percent.

Gold remained relatively firm after three 2017 U.S. interest rate hikes, but further rate hikes could pressure gold prices by raising the opportunity cost of non-yielding bullion.

"We see a trading range of \$1,225-\$1,430 for gold this year, with an average price of \$1,290," INTL FCStone said in a note.

"Our number suggests we are closer to a top (than) a bottom, a position we are comfortable with as we are not sure gold could withstand the higher-yield environment going into next year, especially if the (weaker) dollar eventually reverses course."

Palladium, which hit a record high of \$1,138 an ounce on Monday, was down 3 percent at \$1,091.97 an ounce. It has had a sustained rally as high demand in the auto industry fueled supply concerns, sending Nymex palladium futures net long positions to record highs.

Silver was down 1 percent at \$17.17 an ounce, off the previous day's three-month high of \$17.42. Platinum was up 0.2 percent at \$998, touching a Monday peak of \$1,001.40, its strongest since Sept. 11.

OIL – Daily Outlook**Oil prices drop off 3-year highs but strong demand supports - Reuters News**

Oil prices dropped off three-year highs on Tuesday as traders booked profits but healthy demand underpinned prices near \$70 per barrel, a level not seen since the market slump in 2014.

Prices have been driven up by oil production curbs in OPEC nations and Russia, and demand amid healthy economic growth.

Imports to India, the world's third-biggest oil consumer, rose by about 1.8 percent in 2017 to a record 4.37 million barrels per day (bpd) as the country boosted purchases to feed its expanded refining capacity.

Brent futures fell \$1.11, or 1.6 percent, to settle at \$69.15 a barrel after hitting a session low of \$68.83. The global benchmark hit a peak of \$70.37 on Monday, matching a high from December 2014 at the start of

a three-year market decline.

U.S. West Texas Intermediate (WTI) crude futures ended at \$63.73 a barrel, down 57 cents, or 0.9 percent. WTI hit a December 2014 peak of \$64.89 earlier in the session.

"It's such a quiet day ... I think this is a pause as you try and decide what the rise in rig counts means and what the Russia comments mean," said Rob Haworth, senior investment strategist at U.S. Bank Wealth Management.

Reacting to the three-year price high, Russian Energy Minister Alexander Novak said the oil market was not yet balanced and that the global deal to cut output should continue as the price rise could be due to cold weather.

The U.S. rig count, an early indicator of future output, rose by 10 oil rigs last week to 752 and is much higher than a year ago when only 522 rigs were active.

"All in all, this is still a pretty positive day because even though there is no news to drive prices, you're not giving up much ground here," Haworth said.

Most analysts and market participants said oil is vulnerable to profit taking as hedge funds and money managers have amassed a record number of bullish bets on U.S. crude.

In addition, trading was thin on Monday due to the Martin Luther King Jr. Day holiday in the United States.

Fundamentally, oil has been pushed higher by an effort led by the Organization of the Petroleum Exporting Countries and Russia to withhold production since January last year. The cuts are set to last through 2018.

The restraint has coincided with healthy oil demand, pushing up crude by almost 15 percent since early December.

"This rally has been driven first by robust fundamentals, with strong demand growth and high OPEC compliance accelerating," U.S. bank Goldman Sachs said in a note.

"We see increasing upside risks to our \$62 per barrel Brent and \$57.5 per barrel WTI forecast for the coming months."

Other banks, including Bank of America Merrill Lynch, Societe Generale and Morgan Stanley, have raised their price forecasts.

"Our view is that prices are overheated, and will correct lower," SocGen said in a note. "We believe that the current situation, with strong uplift from fundamentals, non-fundamentals, and geopolitics all at the same time, is not sustainable."

A factor that held back crude prices in 2017, the surge in U.S. production, has stalled at least temporarily due to icy winter weather.

U.S. production has fallen from 9.8 million barrels per day in December to 9.5 million bpd currently. Oil production in North Dakota rose 11,000 bpd to 1,195,000 bpd in November, monthly data showed.

However, most analysts still expect U.S. output to break above 10 million bpd soon.

U.S. shale production for February is expected to rise by 111,000 bpd to 6.55 million bpd, the U.S. Energy Information Administration said on Tuesday. [\(Source Reuters, Research – @her1en\)](#)
