GLOBAL MARKETS

- U.S. stocks ended mixed on Wednesday while most other global shares rose, as investors were drawn to riskier assets because of upbeat earnings from companies in Europe and the United States.

GLOBAL ECONOMIES

- China's better-than-expected economic expansion in the first quarter was backed by a pickup in construction and industry, while a slowdown in the services and agriculture sectors dragged on growth, official data showed on Wednesday.
- Japan's exports rose less than expected in March due to a strong yen, raising some concern about the outlook for shipments on top of anxiety over Washington's criticism of the nation's large trade surplus with the United States.
- Inflation in the 19 countries sharing the euro currency rose in March by less than previously estimated, European statistics office Eurostat said on Wednesday, as unprocessed food prices increased by less than previously thought.
- British inflation unexpectedly cooled to a one-year low in March, calling into question whether the Bank of England will raise interest rates more than once before the end of the year.
- The Bank of Canada held interest rates steady on Wednesday, as expected, but said more hikes will be needed over time and pointed to a pick up in wage growth and inflation, two issues that have concerned the central bank.

GLOBAL MARKETS & ECONOMIES

GLOBAL MARKETS

U.S. & Global Markets – U.S. stocks ended mixed on Wednesday while most other global shares rose, as investors were drawn to riskier assets because of upbeat earnings from companies in Europe and the United States.

The U.S. dollar clung to gains amid fading concerns over a global trade war, while oil soared on a reported decline in U.S. crude inventories and the possibility of supply disruptions.

MSCI's gauge of stocks across the globe touched its highest since March 21 and was last up 0.43 percent.

The index was supported by a higher open on Wall Street following the latest batch of earnings. Morgan Stanley shares rose 3 percent after the bank reported a 40 percent jump in quarterly profit, driven by its trading business. Its shares ended the day up only 0.4 pct, however.

"Earnings continue to progress on the positive side and commodities are also on the rise; that should give the markets another boost," said Peter Cardillo, chief market economist at Spartan Capital Securities in New York.

Stocks bounced around, dipping after a Federal Reserve report saying that robust business borrowing, rising consumer spending and tight labor markets indicate the U.S. economy remains on track for continued growth, with trade war risks the one big outlier.

The Dow Jones Industrial Average fell 38.56 points, or 0.16 percent, to 24,748.07, the S&P 500 gained 2.25 points, or 0.08 percent, to 2,708.64 and the Nasdaq Composite added 14.14 points, or 0.19 percent, to 7,295.24.

Investors appeared to be focusing on fundamentals after weeks dominated by geopolitical tensions, including the prospect of trade wars and more missile strikes in Syria.

"The safety trade that we have experienced seems to have ended," said Cardillo.

Shares of International Business Machines Corp tumbled more than 7.5 percent after its profit margins fell short of Wall Street expectations.

European shares firmed amid strong company results, including those from French food group Danone, private healthcare provider Mediclinic and Dutch oil and chemical storage company Vopak.

The pan-European FTSEurofirst 300 index rose 0.30 percent.

Oil extended gains, with Brent crude soaring more than 3 percent, on a reported decline in U.S. crude inventories and after sources signaled top exporter Saudi Arabia wants to see crude closer to \$100 a barrel.

U.S. crude rose 3.44 percent to \$68.81 per barrel and Brent was last at \$73.82, up 3.13 percent.

The U.S. dollar held steady versus a basket of major currencies as solid company results and fading concerns about a trade war helped keep a lid on safe-haven demand for the greenback.

The dollar index, which measures the greenback against a basket of six major currencies, rose 0.11 percent.

Trading across U.S. government bond maturities was range-bound on Wednesday, with yields little changed in spite of gains in the equity market in the last few sessions.

"Generally, the bond market seems to be under-reacting to both the sell-off and the rally," said Subadra Rajappa, head of U.S. rates strategy at Societe Generale in New York. [nL1N1RV1H1

Benchmark 10-year notes last fell 16/32 in price to yield 2.8728 percent, from 2.814 percent on Tuesday.

GLOBAL ECONOMIES

China – China's better-than-expected economic expansion in the first quarter was backed by a pickup in construction and industry, while a slowdown in the services and agriculture sectors dragged on growth, official data showed on Wednesday.

The construction and manufacturing sector grew 6.3 percent from a year earlier, accelerating from a 5.7 percent pace in the fourth quarter,

according to more detailed data released by the National Bureau of Statistics a day after quarterly GDP.

China's economy expanded 6.8 percent in January-March, beating expectations for a 6.7 percent gain, riding on the coat-tails of robust property investment and resilient consumer demand.

Manufacturing also rebounded early this year after authorities lifted winter pollution restrictions and as steel mills cranked up output as construction swung back into high gear.

But economists still expect China to lose momentum in coming quarters as Beijing forces local governments to pare back infrastructure projects to contain their debt, and as property sales cool further due to strict government controls on purchases to fight speculation.

More than 100 cities have introduced some measures to cool home prices. Still, analysts expect moderate price appreciation in China's vast number of smaller centres where regulations are less restrictive.

"We think the pick-up in industry and construction will prove short-lived as the temporary boost to factory activity from the easing of pollution controls fades and tighter restrictions on off-budget spending by local governments weigh on infrastructure investment," said Julian Evans-Pritchard, senior China economist at Capital Economics.

China's construction and manufacturing accounted for 39 percent of gross domestic product in the first quarter, roughly in line with its 41 percent share in the previous quarter, according to Reuters calculations based on statistics bureau data.

The services sector continued to be the biggest contributor to GDP, accounting for 57 percent of China's economic output in the first quarter.

Services grew 7.5 percent from a year earlier, slowing from 8.3 percent in the fourth quarter, while agriculture expanded 3.2 percent in January-March, easing from the 4.4 pace in the previous three months.

Real estate grew 4.9 percent in the first quarter, marginally faster than the 4.8 percent pace in the previous quarter.

Accommodation and catering expanded 7.0 percent, little changed from 7.1 percent growth in October-December.

The retail and wholesale sector slowed slightly to 6.8 percent growth from 6.9 percent in the previous quarter.

The sector faces headwinds, with property sales and retail sales both vulnerable to a weakening labour market, slower credit growth and government controls on property purchases, Evans-Pritchard said.

The tech sector sustained its double-digit growth in the first quarter, though its pace slowed slightly to 29.2 percent from 33.8 percent in October-December.

Japan – Japan's exports rose less than expected in March due to a strong yen, raising some concern about the outlook for shipments on top of anxiety over Washington's criticism of the nation's large trade surplus with the United States.

Wednesday's trade data comes during a two-day summit between U.S. President Donald Trump and Japanese Prime Minister Shinzo Abe that threatens to put Japan in the crosshairs of Trump's protectionist trade policies.

While the trade surplus with the United States narrowed slightly by 0.2 percent year-on-year to 623.1 billion yen (\$5.82 billion) in March, it was still sizable enough to draw criticism from Trump.

The backdrop of rising trade tensions, stoked by the bitter U.S.-China tariff standoff, have roiled financial markets as investors worried about their impact on global growth.

Growth in export-reliant Japan could be undermined in the event of a hit to world trade, or if the United States seeks measures to lower its trade deficit with the world's third-biggest economy.

"Exports can continue to grow, because there is overseas demand for capital goods," said Yusuke Ichikawa, senior economist at Mizuho Research Institute.

"We need to watch for risks posed by trade policy, because there is a sense Japan will have to make some concessions to the United States."

In March, the data showed shipments grew 2.1 percent from the same period a year ago, below the 4.7 percent annual increase expected by economists in a Reuters poll. In February, exports grew 1.8 percent.

The yen was 6.3 percent higher versus the dollar in March compared to the same period a year ago, finance ministry data showed. This weighed on the value of Japan's exports.

In volume terms, Japan's exports rose 1.8 percent year-on-year in March, reversing a 2.1 percent annual decline in February, a reason to not become overly pessimistic, Ichikawa said.

Exports in March were supported by an increase in shipments of cars, and semiconductor manufacturing equipment, the data showed.

Japan's exports to the United States rose 0.2 percent year-on-year, much slower than a 4.3 percent annual increase in February.

Since taking office last year, Trump has pushed to re-write free-trade deals to secure more protection for U.S. exports and jobs.

The U.S. president has imposed tariffs on steel and aluminium imports, which affect Japanese companies, and has also criticised Japan for its low number of U.S. auto imports.

At the summit with Trump, Tokyo is eager to avoid being pushed into talks on a two-way free trade agreement aimed not only at market access but at monetary and currency policies.

Japan's exports to the European Union slowed sharply to a 0.3 percent annual increase in March from an 11.5 percent increase in February, which could raise some concern about demand from Europe.

In one positive sign, Japan's exports to China jumped 10.8 percent in March from a year ago, rebounding from a 9.7 percent decline in February as factories resumed operations after the Lunar New Year holidays.

Economists expect Japan's exports to expand at a slower pace than last year due to a tapering off in demand for semiconductors and electronic parts.

Euro Zone – Inflation in the 19 countries sharing the euro currency rose in March by less than previously estimated, European statistics office Eurostat said on Wednesday, as unprocessed food prices increased by less than previously thought.

The downward revision shows the difficult task the European Central Bank (ECB) faces in bringing inflation to its target of close to but below 2.0 percent.

Prices rose by 1.3 percent in March, compared to the same period last year, down from Eurostat's previous estimate of 1.4 percent. Compared to the previous month, prices were up 1.0 percent.

Unprocessed food prices, previously seen expanding by 0.9 percent, rose by 0.8 percent in March. Services and energy prices contributed most to the annual rise, but energy prices fell in March compared to February.

Without energy and unprocessed food prices, the two most volatile components, prices rose 1.3 percent on the month and year-on-year, a slight increase from the previous annual rates.

The ECB defines this as its core inflation metric.

UK – British inflation unexpectedly cooled to a one-year low in March, calling into question whether the Bank of England will raise interest rates more than once before the end of the year.

Sterling tumbled below \$1.42 and British government bond prices shot up after official data on Wednesday showed annual consumer price inflation fell to 2.5 percent from 2.7 percent in February. The figure was well below economists' average expectation in a Reuters poll for it to hold at 2.7 percent.

While the inflation fall is good news for consumers who have been squeezed since the 2016 Brexit vote hammered the value of the pound, it

suggests price pressures may not be as strong as the central bank had thought.

For the first quarter as a whole, annual inflation averaged 2.7 percent -- below the forecast of 2.9 percent that the BoE made in February.

A firm majority of economists polled by Reuters in the run-up to the data predicted that the Bank would raise interest rates by 0.25 percentage points to 0.75 percent at its May policy meeting.

Most stuck to that view in light of Wednesday's figures, but some said the chances of a second rate hike later this year -- that many had earmarked for November -- now looked shaky.

"An increase in May is still very much on the cards, but the market will reduce its expectations further out," said Neil Birrell, chief investment officer at Premier Asset Management.

Interest rate swaps price in a two thirds chance that the BoE will raise rates in May, but the chance of a further rise to 1 percent before the end of the year is now about one-in-three.

Two-year gilt yields dropped 8 basis points to a one-month low of 0.808 percent -- their biggest intra-day fall of 2018 - before recovering to 0.85 percent.

Canada – The Bank of Canada held interest rates steady on Wednesday, as expected, but said more hikes will be needed over time and pointed to a pick up in wage growth and inflation, two issues that have concerned the central bank.

It has increased rates three times since July 2017.

"We think the bank is on track to raise rates by July," said Sal Guatieri, senior economist at BMO Capital Markets.

"Clearly any bad news on the trade protectionism front or NAFTA talks would delay the Bank of Canada or if we see the housing market weakening more than expected in response to the tougher mortgage rules," Guatieri added.

The Canadian dollar weakened slightly against its U.S. counterpart as some investors had bet on a surprise hike or more hawkish language from policymakers, but the currency could regain some strength as markets digest the full monetary policy report that accompanied the rate decision.

"I think the statement will be read as making clear that further rate hikes are probably going to be needed over the course of this year, and with that some modest strength (in the Canadian dollar) could emerge," said Paul Ferley, assistant chief economist at Royal Bank of Canada.

The bank reiterated that policymakers "will remain cautious" with respect to future rate moves as it watches to see how Canada's highly indebted households manage the higher borrowing costs.

While the bank trimmed its economic growth forecast for 2018 it hiked the outlook for 2019, saying the economy is operating with little slack and the temporary factors weighing on inflation have largely dissipated.

Projected growth in the United States, Canada's largest trading partner, has been boosted by government spending plans, but the bank said rising geopolitical and trade conflicts risk undermining global expansion. The renegotiation of NAFTA prompted by U.S. President Donald Trump has weighed on business confidence and delayed investment.

The bank said exports will strengthen as demand increases, but said growth is increasingly being limited by capacity constraints. Exports and investment to build capacity are being held back by competitiveness challenges and trade worries.

While changes in mortgage rules pulled forward housing activity to late 2017 and exports faltered in the first quarter on transportation bottlenecks, the weakness in both are expected to unwind, the bank said.

ASIAN STOCK INDEX

Japan's Nikkei share average raced to a seven-week high on Wednesday as risk sentiment recovered after Wall Street rose overnight on earnings hopes, while a weaker yen lifted shares across the board.

Also helping the mood was an easing political tensions on the Korean peninsula after a senior U.S. official said CIA Director Mike Pompeo made a secret visit to North Korea over the Easter weekend and met with North Korean leader Kim Jong Un. The Nikkei ended 1.4 percent higher to 22,158.20, its strongest closing level since Feb. 27.

The dollar rose 0.3 percent to 107.295 yen after dipping to 106.885 on Tuesday.

Index-heavy stocks such as Fast Retailing Co and Fanuc rallied 2.1 percent and 2.9 percent, respectively, while exporters advanced as well. Advantest rose 3.8 percent, TDK Corp added 2.5 percent and Panasonic Corp advanced 1.5 percent.

The broader Topix gained 1.1 percent to 1,749.67.

South Korea's KOSPI stock index ended higher on Wednesday. The won reversed earlier gains and closed lower while bond yields rose.

At 06:32 GMT, the KOSPI was up 26.21 points or 1.07 percent at 2,479.98. The index closed at its highest since March 22.

South Korea said it is considering how to change an armistice with North Korea into a peace agreement, as U.S. officials confirmed an unprecedented top-level meeting with the North Korean leader, easing political tensions over the Korean peninsula. The move cheered sentiment, pushing up market heavyweights such as Samsung Electronics and SK Hynix, up 2.8 percent and 2.2 percent respectively.

The won was quoted at 1,068.7 per dollar on the onshore settlement platform, 0.16 percent weaker than its previous close of 1,067.

In offshore trading, the won was quoted at 1,067.73 per U.S. dollar, down 0.15 percent from the previous day, while in one-year non-deliverable forwards it was being transacted at 1,052.8 per dollar.

MSCI's broadest index of Asia-Pacific shares outside Japan was up 0.55 percent, after U.S. stocks ended the previous session higher Japanese stocks rose 1.42 percent.

The KOSPI is down around 0.6 percent so far this year, and down by 1.76 percent in the previous 30 days.

In money and debt markets, June futures on three-year treasury bonds fell 0.02 points to 107.82.

The Korean 3-month Certificate of Deposit benchmark rate was quoted at 1.65 percent, while the benchmark 3-year Korean treasury bond yielded 2.191 percent, higher than the previous day's 2.18 percent.

Hong Kong stocks rose on Wednesday, breaking a four-day losing streak, as China's surprise cut in banks' reserve requirement ratios buoyed financial shares.

The Hang Seng index rose 0.7 percent, to 30,284.25, while the China Enterprises Index also gained 0.7 percent, to 11,986.07 points.

The financial sector rose nearly 1 percent, after the People's Bank of China said late on Tuesday it would slash reserve requirement ratios (RRRs) for most banks by 100 basis points (bps), a move analysts say will reduce financing costs for lenders.

The sub-index of the Hang Seng tracking energy shares rose 1.6 percent while the IT sector rose 0.55 percent, the financial sector was 0.91 percent higher and property sector rose 0.58 percent.

The top gainer on Hang Seng was AIA Group Ltd up 2.52 percent, while the biggest loser was Geely Automobile Holdings Ltd which was down 2.90 percent.

Around the region, MSCI's Asia ex-Japan stock index was firmer by 0.59 percent while Japan's Nikkei index closed up 1.42 percent.

The yuan was quoted at 6.2844 per U.S. dollar at 08:15 GMT, 0.02 percent firmer than the previous close of 6.2855.

About 2.06 billion Hang Seng index shares were traded, roughly 112.1 percent of the market's 30-day moving average of 1.84 billion shares a day. The volume traded in the previous trading session was 1.98 billion.

At close, China's A-shares were trading at a premium of 22.64 percent over the Hong Kong-listed H-shares.

The price-to-earnings ratio of the Hang Seng index was 12.32 as of the last full trading day while the dividend yield was 3.2 percent.

China stocks ended higher on Wednesday, buoyed by banking firms, after a surprise cut in reserve requirements.

The blue-chip CSI300 index rose 0.5 percent to 3,766.28, while the Shanghai Composite Index gained 0.8 percent to 3,091.40.

Chinese banking shares closed up 1.1 percent, after the central bank said late on Tuesday it was slashing reserve requirement ratios (RRRs) for most banks by 100 basis points (bps).

The move will reduce financing costs for banks and free up more funds for lending to small firms, but falls short of broad monetary easing, with the authority attaching requirements on how funds must be used.

"The ratio cut doesn't constitute broad monetary easing. But it does signal that - despite the recent strength of the official data - policymakers are starting to balance concerns about economic conditions alongside their longstanding desire to contain credit risks," said Mark Williams, chief Asia economist at Capital Economics.

That was echoed by UBS Securities, which added that recent market turmoil and fragile sentiment amid rising trade frictions may be a minor policy concern.

Around the region, MSCI's Asia ex-Japan stock index was firmer by 0.43 percent, while Japan's Nikkei index closed up 1.42 percent.

CURRENCIES – Daily Outlook

Dollar edges up on higher U.S. yields, rate-hike view - Reuters News

The U.S. dollar rose modestly against a basket of currencies on Wednesday, buttressed by higher U.S. bond yields and the view the Federal Reserve would raise interest rates further on signs of ongoing economic growth.

The dollar also has found support from reduced fears about a U.S. trade war with China and that Western air strikes on Syria would intensify.

The Federal Reserve's latest Beige Book, released on Wednesday, showed the U.S. economy was growing at a modest to moderate pace in March through early April.

Nevertheless, the greenback remains on a bearish path on expectations that the U.S. trade and federal deficits would balloon in the coming quarters, many analysts said.

"We have been in a remarkable stable range since February," said Paresh Upadhyaya, director of currency strategy at Amundi Pioneer Investments in Boston. "There are opposing factors that have kept the dollar in this narrow range."

The dollar index, which tracks the greenback against a basket of six currencies, gained 0.12 percent, to 89.626. It has moved between 88.253 and 90.932 since mid-February.

U.S. two-year Treasury yield hit 2.431 percent on Wednesday, which was its highest since September 2008, Reuters data showed.

The yield spread on U.S. two-year Treasuries and German two-year Bunds grew to 300 basis points, the widest in nearly three decades, increasing the appeal of holding dollars versus the euro.

The euro was up 0.03 percent, at \$1.2374, while the greenback was 0.27 percent higher at 107.28 yen.

Among other G10 currencies, the pound was down 0.6 percent at \$1.4201 after it was nudged away from a post-Brexit referendum 22-month high of \$1.4377 on Tuesday by weaker-than-expected British wage data.

Annual British consumer price inflation slowed to 2.5 percent in March from 2.7 percent posted in February.

Markets were still pricing in a more than even chance the Bank of England will hike interest rates in May, expectations of which have helped sterling advance aggressively this month.

The Canadian dollar weakened 0.6 percent to C\$1.2630 per dollar after the Bank of Canada, as expected, left key rates unchanged, but the tone in its policy statement was not as hawkish as some traders had expected.

Precious Metal – *Daily Outlook***Gold advances on technical buying, light safe haven demand - Reuters News**

Gold prices rose to a one-week high on Wednesday on technical trading and some safe-haven demand even as the dollar held on to gains and stocks rose on risk appetite.

Spot gold was up 0.2 percent at \$1,349.71 per ounce by 1:48 p.m. EDT (1748 GMT), after touching its highest since April 11, while U.S. gold futures for June delivery settled up \$4, or 0.3 percent, at \$1,353.50 per ounce.

"We are up on safe-haven demand and a general commodities move," said George Gero, managing director of RBC Wealth Management, adding concerns over U.S. sanctions on Russia still remain.

Gold broke above \$1,350, a significant

resistance level for gold, said Activtrades chief analyst Carlo Alberto De Casa, and a close above this level would confirm positive momentum for gold.

"If gold can remain above the \$1,350 level for a couple of days there is a good chance to see it jumping up to \$1,400," he said.

Kitco Metals senior analysts Jim Wyckoff said the chart positions for gold and silver are "tilted in favor of the bulls, which is inspiring technically based buying interest at mid-week."

The dollar index, which measures the greenback against a basket of currencies, eased toward a three-week low reached on Tuesday. A weaker greenback makes dollar-priced gold cheaper for holders of other currencies.

Dollar losses were capped by a weaker pound which fell to a four-day low on Wednesday after British inflation unexpectedly cooled to a one-year low in March.

Robust corporate earnings this week capped gains in non-interest yielding gold and lifted stocks.

In physicals, Sri Lanka imposed a 15 percent tax on imported gold with effect from Wednesday to prevent illegal smuggling of the metal from the island nation, a finance ministry official said.

Spot silver climbed 2.7 percent at \$17.19 per ounce, after touching its highest since Feb. 1 of \$17.26.

Platinum gained 0.3 percent at \$938.50 per ounce, after hitting a three-week high of \$948.70.

Palladium rose 2.6 percent to \$1,036 per ounce, having touched its highest since Feb. 28, \$1,046.20.

Palladium prices rose on fears of Russian supply disruptions after the recent U.S. sanctions on shareholders of Nornickel, the world's largest producer.

"We believe the recent rally is mainly driven by speculation and the gains are on a weak footing," Julius Baer said, adding that sanctions were unlikely to be extended to Nornickel itself because the United States needs palladium. [\(Source Reuters, Research – @her1en\)](#)

OIL – Daily Outlook**Oil jumps 3 pct on Saudi price target, U.S stockpiles - Reuters News**

Oil futures jumped nearly 3 percent on Wednesday on a decline in U.S. crude inventories and after sources signalled top exporter Saudi Arabia wants to see the crude price closer to \$100 a barrel. OPEC's new price hawk Saudi Arabia would be happy for crude to rise to \$80 or even \$100, three industry sources said, a sign Riyadh will seek no changes to a supply-cutting deal even though the agreement's original target is within sight.

Brent crude futures settled at \$73.48 a barrel, up \$1.90, or 2.7 percent. U.S. West Texas Intermediate crude futures gained \$1.95, or 2.9 percent, to settle at \$68.47 a barrel, their highest

since late 2014.

Prices were supported as U.S. oil stockpiles fell across the board last week with gasoline and distillates drawing down more than expected on stronger demand, according to data from the U.S. Energy Information Administration.

Crude inventories dropped by 1.1 million barrels as a result of a decline of 1.3 million barrels per day in net crude imports.

"This may be one of the most bullish reports in some time, with the across-the-board declines in inventories," said John Kilduff, a partner at Again Capital Management in New York.

"Beyond the headlines, gasoline demand was very strong, virtually summer-like, and crude oil exports are climbed back toward 2 million bpd at 1.75 million."

Buying in anticipation of the report started late Tuesday, said Brian LaRose, a technical analyst with United-ICAP.

The market also found support in expectation that the Organization of the Petroleum Exporting Countries' production cuts will be sustained. OPEC and 10 rival producers have curbed output by a joint 1.8 million bpd since January 2017 and pledged to do so until the end of this year.

OPEC's ministerial committee tasked with monitoring the group's supply-cutting deal with non-OPEC countries, led by Russia, meets in the Saudi city of Jeddah on Friday.

"Despite an oil price of over \$70 per barrel and the fact that the oversupply has been eliminated, a phase-out of the production cuts will not be on the agenda," Commerzbank oil analyst Carsten Fritsch said.

Oil has been supported by the perception among investors that tensions in the Middle East could lead to supply disruptions, including renewed U.S. sanctions against Iran, as well as falling output in crisis-hit Venezuela.

Dutch bank ING said in a note to clients that Brent had risen back above \$70 in April "due to geopolitical risks along with some fundamentally bullish developments in the market".

It raised its average 2018 price forecast for Brent to \$66.50 from \$60.25, and its 2018 WTI forecast to \$62.50 from \$57.75.

For next year, however, ING expects lower prices due to rising U.S. crude output, which has jumped by a quarter since mid-2016. [\(Source Reuters, Research – @her1en\)](#)
